PROFESSIONAL SUMMARY

Detail-oriented Software Quality Assurance (QA) Engineer with around one year of professional experience in manual testing of web and mobile applications. Experienced in functional, regression, smoke, exploratory, and API testing across AI-powered, SaaS, and CRM platforms. Passionate about delivering reliable software through thorough testing, effective defect reporting, and close collaboration with development teams.

PROFESSIONAL EXPERIENCE

QA Engineer | Octopi Digital LLC | *Nov 2025 – Present*

- Performed manual testing for web/mobile apps; designed and executed functional/regression test cases.
- Reported defects via Linear; verified bug fixes across multiple builds before production releases.
- Participated in sprint testing, release validation, and API validation using Postman.
- Collaborated with developers and product managers to validate new features and improve release quality.

Software QA Intern | Zensoft Lab | *Aug 2025 – Nov 2025*

- Executed manual testing and designed test cases; reported defects using Jira.
- Verified bug fixes through regression testing and assisted with API testing using Postman.

PROFESSIONAL PROJECTS

NuPath AI – AI-Powered Mobile Wellness

- Tested AI chat, voice, and wearable integration; executed 40+ test cases across Android/iOS.

OPSROI – CRM & Operations Platform

- Validated lead management, invoicing, and RBAC; tested Twilio features and client portal.

Client Management System – Web SaaS Platform

- Tested payments, support ticket workflows, and role-based permissions before release.
